**DECOMPOSITION** reflects a collective of individual interpretations into the future of dark ambient dance music with the vox of Tamara Kent proffered as the strobe to light the way. **MINEFIELD** begins with the refinement of lyrical subtleties and the vocal finesse of Tamara Kent. And along the way, **MINEFIELD** reveals a consortium of unique talent spidering up from the dark Underground of modern electronic dance movements. Interdimensional Industries (Canada) reaches beyond the North American shores to attract the seismic interest of Karl Mohr - [www.karlmohr.com](http://www.karlmohr.com). **MINEFIELD** now shares erotic ambient twilight dancing across the electro horizon with Karl Mohr, Blue Mars, Dead Poets Society, Ingrown, Soviet Radio, Cryptomnesia, Synthetic Dream Foundation, Spectre VII, and Soy Futura. Each artist now infusing attenuated elements specifically targeting the needs of music enthusiasts thirsty for intoxicating new dance floor vibrations. Example: Seductive trip hop cascades into a syncopated dissonance, and then evaporates, leaving the resonant vocal prowess of Tamara Kent wafting like a thick fog through a chamber of piano chords.
